About Safety Shield Global

Safety Shield Global is a pioneering force in digital safety solutions. We are transforming how people act and behave around machines, with intelligent systems, real insights, and measurable safety outcomes resulting in real behavioural change.

Our mission is to redefine safety standards where People Plant Interface (PPI) occurs in high-risk industries across the globe. By harnessing next-generation AI and real-time data, we're empowering teams to operate smarter, safer, and more efficiently.

Safer behaviours. Smarter machines. Saving lives.

My personal mission is to stop plant from hitting people. Any death or life-changing workplace accident is one too many. I believe that these deaths are all avoidable and our safety ecosystem can provide that solution."

Jonathan Guest
Safety Shield Global CEO and Founder

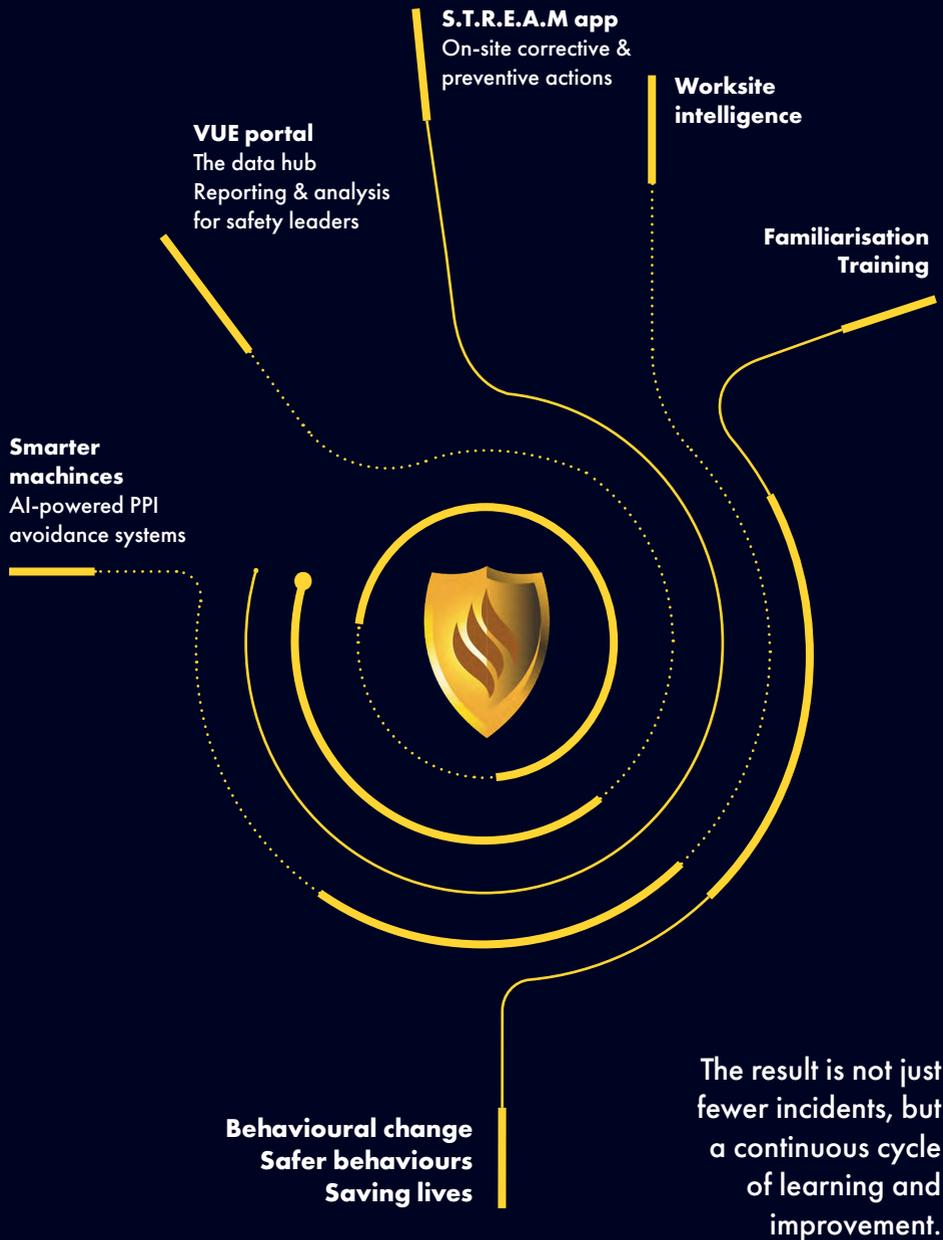

People and plant don't always mix.

Across high-risk industries like construction, agriculture and waste management, PPI incidents remain one of the most serious causes of harm in the workplace. Even with robust systems and diligent safety leadership, the risks persists, and consequences can be severe.

What we aim to deliver for you:

- A connected approach that unites people, plant, and safety leadership through innovative solutions
- The ability to achieve real-time visibility of risks and exposures, not just retrospective reporting
- Digital tools that influence daily behaviours on the ground, far beyond ticking compliance boxes
- Data translated into actionable insights that spark cultural change and guide strategic decisions
- Reduction in installation time, costs, and hardware requirements, while deploying world-leading collision avoidance software directly onto OEMs' existing hardware
- Opportunities to demonstrate leadership in safety innovation, setting a benchmark for clients, projects, and the wider industry

Closing the loop on People Plant Interface Safety: Our safety ecosystem

Why Safety Shield Global?

Born out of a PPI tragedy which saw a close friend of founder and CEO, Jonathan Guest, crushed to death on a building site, Safety Shield Global has gone from strength to strength over the past 15 years. We have a sole mission to reduce PPI incidents. We are leaders in providing exceptional digital services to our clients and driving innovation in the industries we work with.

Industry solutions

Every industry faces its own challenges. Our solutions are industry-specific designed to help you stay ahead in your People Plant Interface strategy.

These are some of the industries we work in:

- Agriculture
- Construction
- Forestry
- Highways
- Industrial
- Quarry & mining
- Rail
- Utilities
- Waste management

How we work with clients

Solution driven

We listen to find solutions to fit your needs

Industry specific

Digital safety solutions tailored for specific industries

Relentless innovation

We're constantly pushing the boundaries of what's possible, providing the most advanced AI-powered human form recognition on the market

Expertise and leadership experience

Providing our clients access to our subject matter experts. Over 150 years leadership experience in plant and construction. A team of in-house developers based in Cheshire, UK

Let's explore how our safety ecosystem can give you the visibility, control and cultural impact you need to set the standard in People Plant Interface safety.
